Summary

Computer Science undergraduate (2026) with a strong foundation in full-stack web development and applied AI. Passionate about building intelligent, scalable, and user-centered digital solutions. Experienced in developing real-time MERN applications, RESTful APIs, and integrating AI models (Hugging Face, OpenRouter) for smarter user experiences. Skilled in Python for data analysis and ML model deployment.

Hands-on experience in designing and working with document intelligence systems at an enterprise level, including document ingestion pipelines, text preprocessing, vector embeddings, and Retrieval-Augmented Generation (RAG) workflows. Contributed to building reliable AI pipelines focused on structured and unstructured document understanding, emphasizing accuracy, validation, and production readiness in real-world use cases.

Skills

- **Programming:** JavaScript, Python, Java, C, SQL
- **Web Development:** React.js, Node.js, Express.js, Next.js, HTML5, CSS3, Tailwind, Bootstrap
- **AI/ML:** Scikit-learn, TensorFlow, Pandas, NumPy, Model Training & Deployment, Hugging Face, OpenRouter
- **Database & DevOps:** MongoDB, MySQL, Firebase, Render, Vercel, GitHub Actions
- **Tools & Soft Skills:** Git, Postman, Cloudinary, Communication, Leadership, Teamwork

Projects & Experience — Profile Portfolio

AI/ML Intern — L&T Technology Services

Jan 2026 – Present

Vadodara, India

- Working on applied machine learning solutions for enterprise-scale problems
- Assisting in data preprocessing, feature engineering, and model experimentation
- Exposure to real-world industrial datasets, validation pipelines, and production constraints

HealthChecker – AI/ML Health Prediction App

[GitHub](#)

- AI-based health analysis tool using Scikit-learn to predict potential health issues from user data.
- Integrated a clean MERN frontend for predictions and real-time health insights visualization.

MedLinkPlus

[GitHub](#)

- MERN-based healthcare platform for appointments, prescriptions, and medical history
- Role-based dashboards, secure auth, and doctor-patient chat
- MongoDB for record storage, React + Tailwind for responsive UI

Real-Time Chat Site (AI-Integrated)

[GitHub](#)

- MERN + Socket.io for real-time messaging with JWT auth
- Hugging Face API for sentiment analysis & OpenRouter API for AI replies

Amazon Price Tracker Bot

[GitHub](#) [Fiverr](#)

- Puppeteer automation for Amazon price scraping with email alerts
- MongoDB for product data & price history

Education

Parul University, Vadodara

Sept 2022 – Apr 2026

B.Tech in Computer Science & Engineering

CGPA: 7.2

Certifications & Workshops

Certifications: Fullstack Specialization – IIT Roorkee × Microsoft; NPTEL – Computer Networks, TOC.

Workshops: AI/ML Bootcamp, React.js for Dynamic Web Development
